

Assignment : Basic Loop

Problem 1 : Write a program to calculate the sum of the first 10 natural numbers.

Problem 2 : Write a program that prompts the user to input an integer and then outputs the number with the digits reversed. For example, if the input is 12345, the output should be 54321.

Problem 3 : Write a program that prompts the user to input a positive integer. It should then print the multiplication table of that number.

Problem 4 : Write a program to display first n odd numbers.

Problem 4 : Write a program to calculate the factorial of a given number. Like for 5 answer should be 120
